

PeoplePassword

The most flexible Active Directory® self-service password
reset tool on the market today

WEB ACTIVE
DIRECTORY LLC

"The implementation of PeoplePassword was a great success for us. The number of help-desk calls we receive due to password-related issues has dropped significantly."

"Web Active Directory provided us with simple, cost effective software that does exactly what we needed."

"It was an absolute pleasure talking with you guys this morning. I NEVER say that about talking with a vendor. I'm the queen of vendor dodgers because I hate talking to them. But I have to admit I don't feel that way about you guys."

PeoplePassword

- Self-service password reset that provides immediate ROI
- Group-based enrollment and recovery experience
- Optional enrollment data automatically imported from other systems
- Powerful Help Desk delegation to allow assisting end-users
- Rich reporting to prove ROI to management and stakeholders

PeoplePassword provides the most secure and flexible web-based self-service password reset tool for Windows® in the industry. We built PeoplePassword to provide an intuitive user experience that allows the simplest self-service Active Directory® password reset in the industry. We took it a step further and created a powerful administration platform that allows administrators to easily configure highly customized user experiences. Change or add questions, customize email notifications sent to users, and run reports showing fantastic ROI since your users have embraced PeoplePassword and reduced your help desk password reset call volume. We bring it all together for organizations of all shapes and sizes to implement a simple and secure self-service password reset tool that simply WORKS!

Administration Center

- Tailor different enrollment experiences for different groups of users in your environment
- Create your own questions or use best practices questions installed with PeoplePassword
- Customize email notifications and auditing messages
- Provide reports to managers and stakeholders to track PeoplePassword usage and ROI

Enrollment Center

- Provide an intuitive enrollment process using a 100% web-based interface
- Automate the enrollment process for your end-users with our optional PeopleEnroll utility that imports enrollment data into PeoplePassword from other systems
- Access the PeoplePassword Enrollment Center through Windows®, Mac® and other non-Windows platforms using a web browser over SSL

Recovery Center

- Allow users to reset or change AD passwords and unlock AD accounts using a 100% web-based interface, or through the Windows logon screen
- Access the PeoplePassword Recovery Center through Windows®, Mac® and other non-Windows platforms using a web browser over SSL
- Provide AD password management capabilities for users who do not normally log into your AD domain

Help Desk Center

- Allow the help desk to assist users with AD password resets
- Force help desk personnel to verify user identity by answering users enrollment questions

Web Services

- Provide enrollment status to third-party applications
- Force enrollment for users who have not enrolled by integrating with your Windows logon script

System Requirements:

- Microsoft Active Directory 2000+
- Windows Server 2003+
- IIS 6.0+
- ASP.NET 2.0+
- SQL Server 2005+ (or Express editions)
