

PeopleSearch

A simple web-based corporate directory that does more than
just display user information

WEB ACTIVE
DIRECTORY LLC

"Web Active Directory provided us with simple, cost effective software that does exactly what we needed."

"It was an absolute pleasure talking with you guys this morning. I NEVER say that about talking with a vendor. I'm the queen of vendor dodgers because I hate talking to them. But I have to admit I don't feel that way about you guys."

PeopleSearch

- Instant web-based corporate directory using Active Directory data
- Information targeted to different groups of users
- Display user photos along with user information
- Search for Users, Groups, Computers or nearly anything else in AD
- Export data from your Active Directory
- Highly customizable interface to meet widely varied business needs
- Powerful reporting on AD data for users, groups and computers

Online company directory

Create an instant web-based company directory with the ability to target who sees what information in your Active Directory. You can easily customize the view of any information in your directory, including user accounts, contacts, groups, computers and printers.

Active Directory reporting

Powerful reporting capabilities empower administrators, auditors and authorized users to view and run reports on information in your Active Directory. Customize reports to provide access to information that is top priority and specific to your business needs. Run reports on users, groups, computers, printers and nearly any other object in Active Directory.

User photos

Show photos of your users along with their account information in your intranet or Internet site.

Brandable interface to match your corporate image

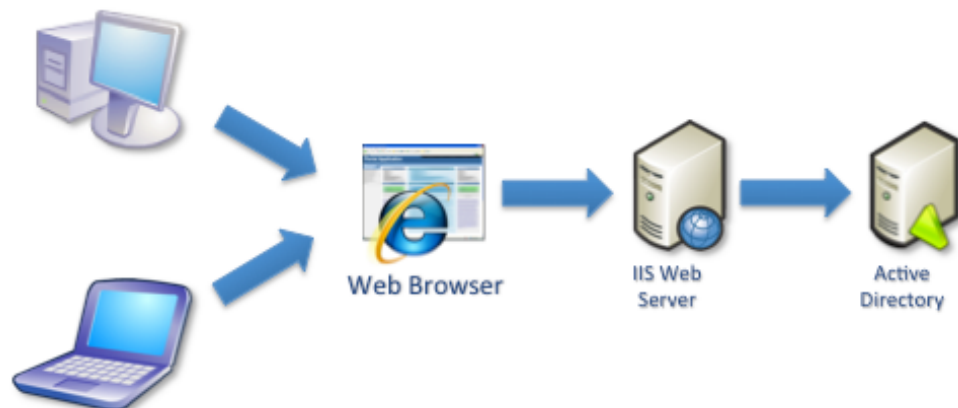

You get full control to customize your PeopleSearch experience to match that of your corporate branding and messaging using CSS 2.0.

Export Active Directory information

Use PeopleSearch to pull hard-to-get Active Directory information into PeopleSearch, then export the data into Excel® for easy manipulation and reporting.

System Requirements:

- Microsoft Active Directory 2000+
- Windows Server 2003+
- IIS 6.0+
- ASP.NET 2.0+
